1. Summary

"YU Kaltura Media Package" is a third-party's Kaltura plugin package for Moodle 2.9 or later. This package is developed by the Center for Information Infrastructure, Yamaguchi University. By using this package, users can upload media to the Kaltura server, and easily embed the media in Moodle courses. Moreover, this package provides some useful functions. Since this package does not require Kaltura Application Framework (KAF), can work with Kaltura Community Edition (CE) and other editions.

In order to use this package, administrators must install "YU Kaltura Media Local Libraries" and "YU Kaltura Media Gallery". These plugins provide functions such as uploading, playing back and deleting media files to users.

In addition, the administrators can install "YU Kaltura Media Assignment", "YU Kaltura Media Resource" and "YU Kaltura Media for Atto". These plugins provide teachers ability of creating resource and activity modules, which use Kaltura media in their Moodle courses.

Please note that there is a chance this module will not work on some Moodle environment. Also, this package is only available in English. Stay tuned to future versions for other language supports.

Original plugin package ("Kaltura Video Package") has better functions than ours and is easy to use. So that, for customers of the "Kaltura SaaS Edition", use the original plugin package is the better.

Today, this package includes plugins as follows.

(1) YU Kaltura Media Local Libraries (local/yukaltura)

This plugin provides libraries and APIs and power other "YU Kaltura Media Package" plugins.

(2) YU Kaltura Media Gallery (local/yumymedia)

This plugin provides media gallery (called "My Media") for users. Through the "My Media", users can upload media files, preview and delete their media, and edit metadata of each media. In addition, users can set enable/disable access restriction to

their own media. Moreover, user can record a video by using PC's web-camera, and can upload the video to Kaltura server. This plugins requires "local_yukaltura" plugin.

(3) YU Kaltura Media Assignment (mod/kalmediaassign)

This is an activity module. Each student can submit a media from their "My Media", and teachers can play submitted media, and grade each media. This plugins requires "local_yukaltura" and "local_yumymedia" plugins.

(4) YU Kaltura Media Resource (mod/kalmediares)

This is a resource module. Teachers can create media play page (embed media) in their courses, and can view students' access status. This plugins requires "local_yukaltura" and "local_yumymedia" plugins.

(5) YU Kaltura Media for Atto (atto_yukaltura)

This plugin is a sub-plugin for the Atto HTML editor. This plugin generate some buttons on toolbar of the Atto HTML editor. By using the buttons, user embed Kaltura media into text content. This plugin requires "local_yukaltura" and "local_yumymedia".

<Requirements>

- PHP5.3 or greater.
- Web browsers must support the JavaScript and HTML5.
- System administrators must use the HTTPS protocol for their Moodle site and Kaltura server.
- Administrators must not delete "Default" access control profile from their Kaltura server. If they delete the "Default" profile, they must create new profile named "Default" before install our plugins.
- These plugins do not support Flash players. Therefore, please use HTML5 players.

<Supported themes>

- Clean
- Boost (version 1.1.7 and later)
- Classic (version 1.3.0 and later)

This package might be able to work with other themes.

<Warning>

- We are not responsible for any problem caused by this software.
- This software follows the license policy of Moodle (GNU GPL v3).
- "Kaltura" is the registered trademark of the Kaltura Inc.
- Web-camera recording function in supports the Mozilla Firefox, Google chrome, Opera, and Safari. For smartphones and tablets, you can record movies through a normal media uploader.
- Uploading and recording functions in resource and activity modules may not work well with smartphones. Because, low resolution screen cannot display these forms correctly.

2. What's new

Compared to version 1.3, version 1.4 has the following features.

2.1 New features

- We released the YU Kaltura Media plugin (`atto_yukaltura`) for Atto HTML editor. By using this plugin, users can embed their media into various resources and activities. Additionally, users can record and upload new media, and can embed it.

2.2 Support Safari 12.x/13.x on macOS

- Each recording and uploading form supports the Safari 12.x/13.x on macOS. Users can take a video and upload it to their Kaltura server.

2.3 Support GDPR

Each plugin implements APIs for the General Data Protection Regulation (GDPR).

2.4 Separation of upload server

Administrator can specify an upload server separately from delivery server (front node). Separating the upload server from the distribution server prevents deterioration of delivery performance during uploading. If the administrators does not specify the upload server, our plugins use delivery server for uploading.

3. Installation

3.1 Unzip required plugins

Please unzip the plugins into each directory within your Moodle install. Please be sure to install "local_yukaltura" and "local_yumymedia" plugins. After unzip required plugins, you set ownership and permissions of each plugin's directory.

Installation will be completed after you log in as an administrator. In the Moodle 3.0 or later, you should access the "Notifications" menu. If "Plugin requiring attention" notifications are printed, you should click the "Update Moodle database now" button.

Plugins requiring attention

Cancel new installations (4) [Plugins requiring attention](#) 5 [All plugins](#) 411

Custom UIConf
kaltura | player_custom

Player width
iaassign_player_width

If only few players are enumerated, you should re-configure the "Connection Server", "Host account login" and "Host account password". Or, you should purge all caches.

3.2 Configurations

3.2.1 Connection status

(1) Upload URI

If you set a URI, plugins use the URI for uploading. Otherwise, if this item is empty, plugins use the "Server URI" for uploading.

(2) Upload account login

If you set a username (e-mail address), plugins use the username for uploading. Otherwise, if this item is empty, plugins use the "Hosted account login" for uploading.

(3) Upload account password

If you set a password, plugins use the password for uploading. Otherwise, if this item is empty, plugins use the "Hosted account password" for uploading.

3.2.2 My Media Settings

(1) Enable webcam recording

If you use the web-camera recording and upload function for desktop PCs, you should check this box.

(2) Limited access

If you permit certain users can to access the "My Media", should check this box. Contrally, if you want to permit all users to access the "My Media", should uncheck this box.

(3) Access check rule & Keyword

When "Limited access" is enable, only users who match the rules you specified in these items will be allowed access to the "My Media".

(4) Medias per page

This is the number of media displayed per page in the "My Media".

(5) Root category path

This is the root category name of all media uploaded by the users. The category of uploaded media is "*root category name*"->"*username*".

(6) Kaltura mymedia player

This is a player used to play-back media for media preview, link URL, and embed code in the "My Media".

(7) Custom UIConf

If you select a "Custom player" as the "Kaltura mymedia player", please fill UIConf of your custom player in the KMC.

3.2.3 General Settings

(1) Enable HTML5 flavour

Please check this setting to enable to use of the HTML5 flavours when viewing media.

(2) Application name

The application name is the name reported back to the Kaltura server to be used for aggregation by application in the user level reports.

(3) Internal IP Address

A global setting to internal IP address / subnet used in your organization. For example, the IP address is written like 192.168.1.1, and the subnet is written like 192.168.1.0/24. If you need multiple IP address and subnet, those must be separated by whitespace(s).

For example, all private IP addresses are written as follows.

10.0.0.0/8 172.16.0.0/12 192.168.0.0/16

3.2.4 Kaltura Media Assignment Settings

(1) Kaltura Player

This is a player used to play-back submitted media.

(2) Custom UIConf

If you select a "Custom player" as the "Kaltura player", please fill UIConf of your custom player in the KMC.

(3) Player width and Player height

Please input a dimension which is used to display the "Kaltura player" on detailed grading page.

(4) Popup player width and Popup player height

Please input a dimension which is used to display the "Kaltura player" on quick grading page.

(5) Enable uploading

Please check this box to permit students to upload new movie in submission pages. And, if administrators permit users to record media using web-camera in "My Media", students can record new media in the submission pages. If administrators doesn't permit users to use "My Media", the users cannot use these functions.

3.2.5 Kaltura Media Resource Settings

(1) Kaltura resource player

This is a player used to playback media for embedded in the Moodle courses as media resource content. This player will appear as the default player for new Media Resources. If the "**Override media resource player setting**" is unchecked, teachers can use their favorite player for their media resource.

(2) Custom UIConf

If you select a "Custom player" as the "Kaltura resource player", please fill UIConf of your custom player in the KMC.

(3) Override media resource player setting

Please check this box to override the individual media resource player selection. This will force all media resource activities to use the selected "**Kaltura resource player**".

(4) Enable uploading

Please check this box to permit teachers to upload new movie in resource editing pages. And, if administrators permit users to record media using web-camera in "My Media", teachers can record new media in the submission pages. If administrators doesn't permit users to use "My Media", the users cannot use these functions.

3.2.6 Kaltura Attto Plugin Settings

(1) Kaltura atto player

This is a player used to playback media for embedded media in the text content.

(2) Custom UIConf

If you select a "Custom player" as the "Kaltura atto player", please fill UIConf of your custom player in the KMC.

(3) Enable uploading

Please check this box to permit users to upload new movie by using the toolbar of the Atto HTML editor. And, if administrators permit users to record media using web-camera in "My Media", users can record new media, and can embed it into text content. If administrators does not permit users to use "My Media", the users cannot use these functions.

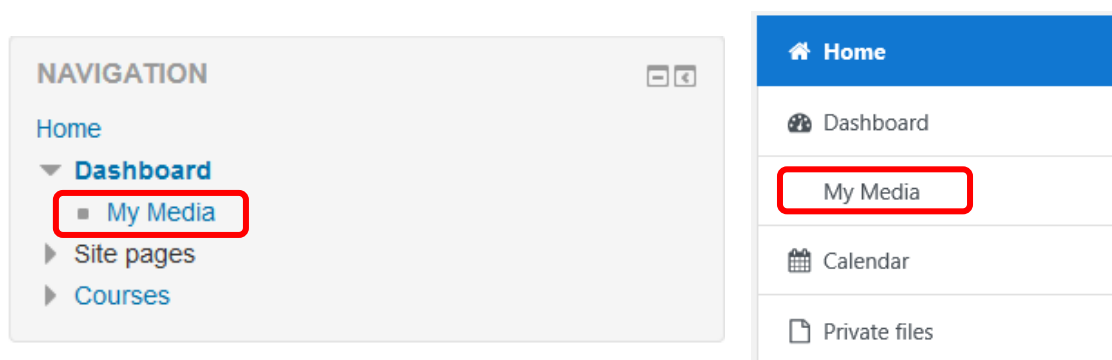

< Notes >

When authentication between the Kaltura server and the Moodle server is failed by mistype or network's trouble, your web browser may keep holding web pages after the authentication fails. In such cases, you must purge all caches in the Moodle server. Then, please visit the setting page again. Similar issue about web cache also may occur in resource and activity modules (mod_kalmediares and modl_kalmediaassign).

4. My Media

4.1 Summary of My Media

Link to "My Media" is placed in "Navigation" block. This is a sub-node of "Site Home" or "Dashboard". In some themes, Link to the "My media" is placed in the "Navigation" block (left-side menu). Version 1.1.7 and later of this package supports the "Boost" theme. And, the Version 1.3.0 and later of this package supports the "Classic" theme.

The "My Media" (local/yumymedia) is a media gallery which displays your own media. And, media uploaders are placed in this gallery. This plugin provides many functions of the "YU Kaltura Media Package".

(1) Preview

Please click this link to display the preview window of your media.

(2) Edit

Please click this link to display a form of metadata (names, tags, metadata) of your media. You can edit and save the metadata by using the form.

(3) Access

Please click this link to display a embed code, URL of play page on the Kaltura server. And, you can configure the access restriction of media. About the Access restriction, you can select "Internal only" or "Default".

(4) Delete

Please click this link to delete your media. You cannot delete the media which is embedded in the Moodle course as "Kaltura Media Resource".

(8) Upload your media
 (9) Upload from webcamra

Uploaded media is added in user's entry list in the "My Media".

Note that "Media converting" will be displayed after the title (name) until the finish of the media conversion process.

4.5 Uploading notes

If an uploading fails due to network disconnection or server down, an error message "**Cannot connect to content server**" will be displayed on the modal window.

On the other hand, if the upload fails due to increasing of system load or server-side script errors, an error message "**Internal Server Error**" will be displayed.

4.6 Preview of media.

Click "Preview" link under a media entry to preview it.

Then, a media player is displayed in a modal window. The type of media player displayed depends on the setting of the local plugin (local_yukaltura).

To close the modal window, click the "Close" button (in upper right of the window) or "Save & exit" button.

4.7 Edit of metadata

Click "Edit" link under a media entry to modify metadata of it.

Then, an input form of metadata is displayed in a modal window. Click "Save& exit" button to save the changes of metadata. In contrast, click "Close" button in upper right of the window to discard the changes of metadata.

If the save of metadata is succeeded, the following dialog is displayed. Click "Continue" button to close the dialog and modal window.

4.8 Setting of access restriction

Click "Access" link to edit the setting of access restriction.

A select box for access restriction is displayed at the bottom of the web page. User can select "Default" or "Internal only". If selected item is changed, "Save" button will be enabled. Then, click the "Save" button to save the changes of access restriction.

After click the "Save" button, a modal window is displayed. After the modal window automatically disappears, web browser moves to the "My Media".

If the modal window keeps to appear, please click "Back" button on the window.

"Internal" is displayed after the title (name) of a media entry if an access control of the media entry is set to "Internal only".

When users cannot play a media entry due to the access restriction, the following error message is displayed in a media player.

4.9 Print of link URL and embed code

Click "Access" link to print a link URL and an embed code of media entry.

A select box for the link URL and embed code is displayed at the middle of the web page. If user selects "Page URL", a link URL of the play page on the Kaltura server is displayed.

On the other hand, if user selects "Embed Code", an embed code is displayed. The embed code is used when user embeds the media player for their media entry in a web page.

4.10 Download of media

Click "Download" link to download a source file of media entry.

Source file name is same as title (name) of the media entry. But, Kaltura APIs about downloading do not support multi-byte characters in the name. So that, multi-byte character in the source file name is replaced to underscore ("_").

4.11 Delete of media

Click "Delete" link to delete a media entry from the Kaltura server.

Then, a confirmation form is displayed. Click "OK, Delete" button to delete the media entry. After the delete of media entry is succeeded, the following page is displayed. Click "Back" button to go back to the "My Media".

This media is used in the following courses.
So that, you cannot delete this media.

Course short name	Course full name
security_201701	Security Fundamental Workshop

5. YU Kaltura Media Resource

"Kaltura Media Resource" (mod_kalmediare) is a resource module. Teachers can create media play page (embedded media) in their courses, and can view students' play/view status. Teachers can choose a media player from Kaltura players, and can set player's size (dimension). Students can play the embedded media.

5.1 Embed a media in Moodle course.

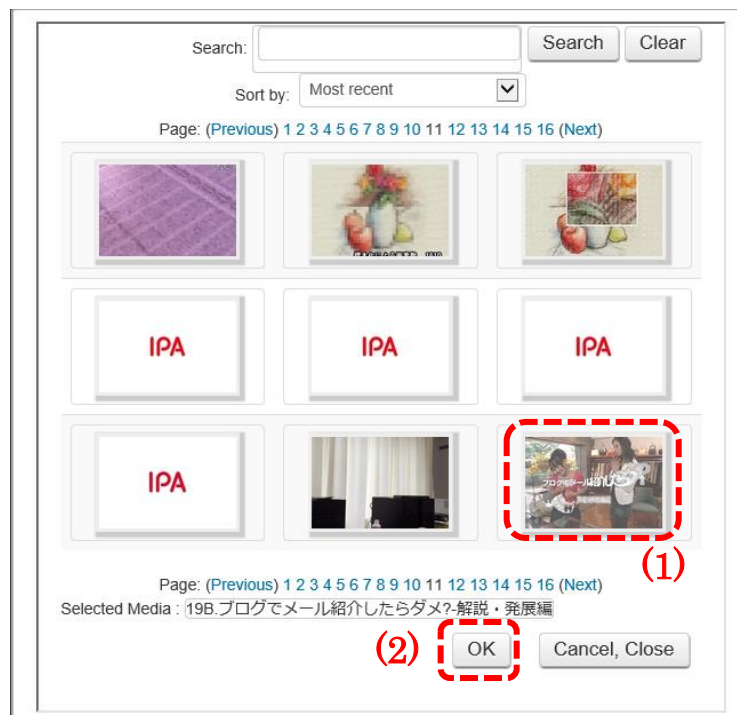

At first, teacher changes a course to "Edit mode". Then, choose the "Kaltura Media Resource" from activity and resource modules, and click "Add" button.

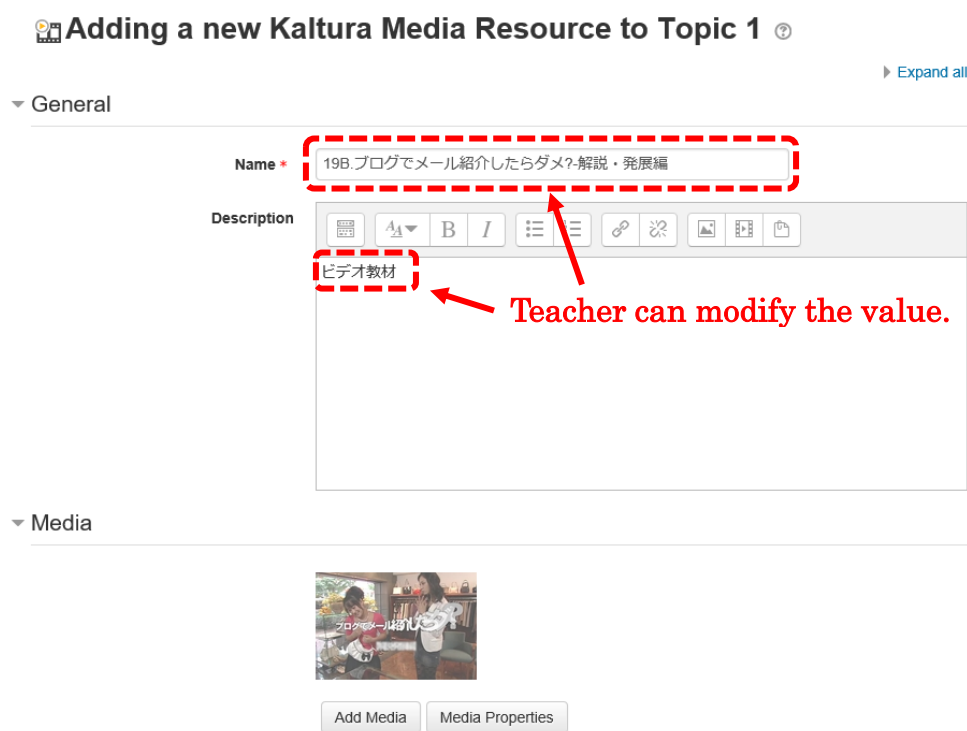

After a configuration form of the module is displayed, click "Add Media" button in "Media" tag.

After a modal window is displayed, teacher choose a media and click thumbnail of the media. And, click "OK" button.

Then, "Name" and "Description" are set to the name and description metadata, respectively. Teacher can modify these value

And, teacher can set "Internal only" value. If this item is set to "Yes", users can view / play the resource only from the certain subnets set in the configuration page of "YU Kaltura Local Libraries". And, if "Publish access log to students" is set to "Yes", each student can view own page view and play counts. Moreover, student's actions in recent certain hours are excluded from statistics when "Exclusion time" set to positive integer. This property is used to hide mechanism of update the number of "plays" and "views" from students.

▼ Access control

Internal only

▼ Publish access log

Publish access log to students

Exclusion time

▶ Common module settings

Then, click "Save and return to course" button.

Finally, the link of media is displayed in the course.

5.2 Play the embedded media

If student wants to play the embedded media, click the resource (link to media play page) in the course.

If the media is a video or an audio content, the Kaltura player is displayed in the media resource page. Note that, the player chosen by the system administrator in the configuration page of "YU Kaltura Local Libraries" is used in the media resource page.

(a) Video content

(b) Audio content

And, if teacher set "Publish access counts to students" in the configuration page, student can see counts of "Media playing" and "Page viewing". If teacher sets the "Exclusion time", a remark is displayed.

Media playing: 1 times before
Page viewing: 3 times before

Media playing: 0 times before
Page viewing: 0 times before

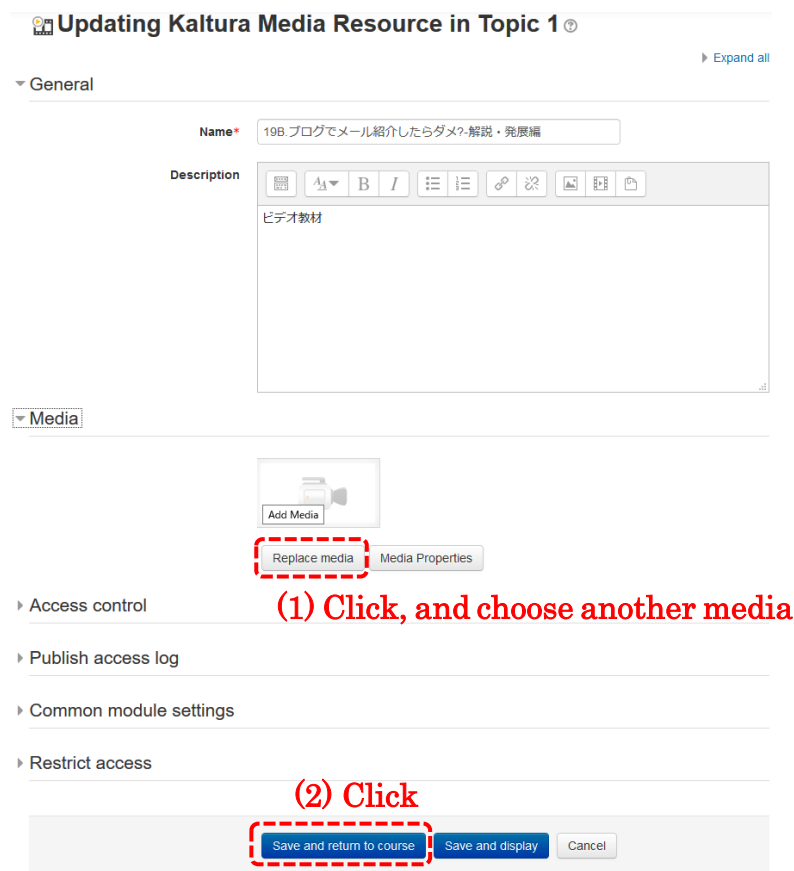

Remarks : Your actions will be added to the statistics after about 12 hours

5.3 Replace the media

If teacher wants to replace the embedded media, teacher changes the Moodle course to "Edit mode". Then, click "Edit settings" from edit menus.

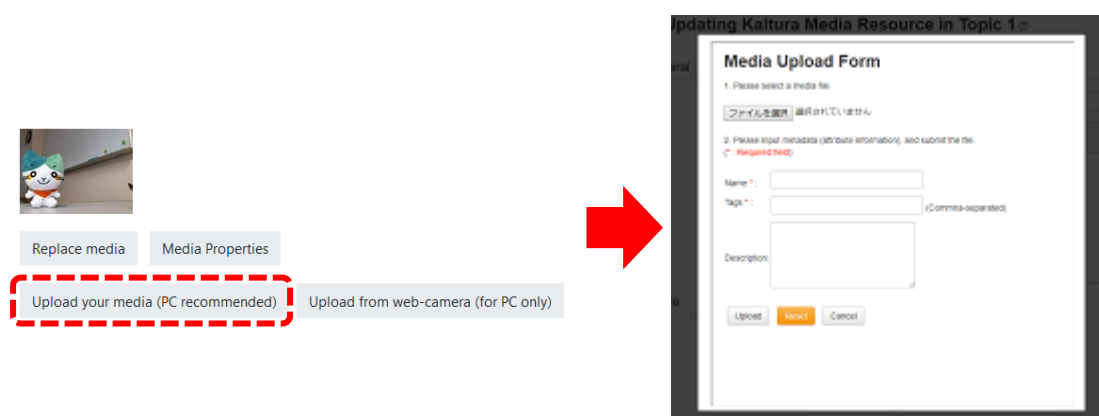

After the configuration page is displayed, teacher clicks "Replace media" button. Then, chooses another media. Finally, click "Save and return to course" button.

5.4 Uploading and Recording new media in resource editing page

If administrators check "Enable uploading" box in configuration page of the "local plugin" and teachers can use "My Media", the teachers can upload new media in editing page of their resource module. When the teacher clicks "Upload your media" button, an upload form displayed as a modal window. Uploading procedure is the same as using the "My Media".

If the teacher can use the webcam upload form in the "My Media", also can use a webcam upload form in resource edition page. When the teacher clicks "Upload from web-camera" button, the webcam upload form is displayed as a modal window. Uploading procedure is the same as using the "My Media". After recording of new movie, the teacher must scroll down the window, and fill the metadata (name, tags, description) of the movie.

In above uploading functions, the modal window is removed after the uploading procedure is finished. Finally, the teacher has to click "Save" button in order to save add/replace operations of media.

Note that, generating thumbnails and distribution files may take some time. Therefore, teachers may not be able to see thumbnail or preview media immediately after uploading.

5.5 View access logs and download log-file

When the teacher view the resource (media play page), the link to access logs page is displayed under the player. Note that, it takes about 1 minute to display this page.

In the access log page, counts of "page viewing" and "media playing" of the students are displayed. Note that, 50 students are listed up per page if number of students are more than 50. And, teacher can download an access log file by click "Download" button. The access log file contains the all students' access logs.

6. YU Kaltura Media Assignment

"Kaltura Media Assignment" (mod_kalmediaassign) is an activity module. Teachers can create a submission box in their courses, and can students can submit media report. Teachers can play submitted media, and grant a score to each media.

6.1 Create submission box in Moodle course.

At first, teacher changes a course to "Edit mode". Then, choose the "Kaltura Media Assignment" from activity and resource modules, and click "Add" button.

Second, the teacher fills out required items, and clicks save button displayed the bottom of screen.

A screenshot of the 'Adding a new Kaltura Media Assignment to Topic 3' form. The form has several sections: 'General', 'Grade', and 'Common module settings'. The 'General' section contains fields for 'Name', 'Description', 'Available from', 'Due Date', 'Prevent late submissions', 'Allow resubmitting', and 'Email alerts to teachers'. The 'Name' field is empty. The 'Description' field is empty. The 'Available from' and 'Due Date' fields are set to December 1, 2018, and December 8, 2018, respectively. The 'Prevent late submissions' field is set to 'No'. The 'Allow resubmitting' field is set to 'No'. The 'Email alerts to teachers' field is set to 'No'. The 'Grade' section is empty. The 'Common module settings' section is empty. At the bottom of the form, there are three buttons: 'Save and return to course', 'Save and display', and 'Cancel'. The 'Save and return to course' button is highlighted with a red dashed box.

6.2 Submit a media

In order to submit a media, student has to upload a media through the "My Media" (See the sections 4.2 and 4.3). Then, the student clicks the submission box in the Moodle course.

Topic 3

After a submission page is displayed, student clicks "Add media" button. A media selection window is displayed as a modal window. Next, the student chooses one media from his/her own media gallery, and clicks "OK" button.

After the selection of movie is finished, the student can preview selected media by click the thumbnail of the media. Preview window is displayed as a modal window.

Finally, the student clicks the "Submit media" button in order to submit the selected media. Then, click "Continue" button in confirm screen.

After the submission procedure has been finished, the Submission status changes to "Submitted for grading".

6.4 Upload and Record new media in submission page

If administrators check "Enable uploading" box in configuration page of the "local plugin" and students can use "My Media", the students can upload new media in a submission page. When the student clicks "Upload your media" button, an upload form displayed as a modal window. Uploading procedure is the same as using the "My Media".

If the student can use the webcam upload form in the "My Media", also can use a webcam upload form in submission page. When the teacher clicks "Upload from web-camera" button, the webcam upload form is displayed as a modal window. Uploading procedure is the same as using the "My Media". After recording of new movie, the student must scroll down the window, and fill out the metadata (name, tags, description) of the movie.

In these uploading functions, the modal window is removed after the uploading procedure finished. Finally, the student has to click "Submit media" button in order to submit the media.

<Notes>

- Generating thumbnails and distribution files may take some time. Therefore, students may not be able to see thumbnail or preview media immediately after uploading.
- Uploading and Recording forms in submission page may not work well with smart phones. Because, low-resolution screens cannot display these forms correctly.

7. YU Kaltura Media for Atto

7.1 Initial configurations

At first, administrator should access the following setting page.

Site administration -> Plugins -> Text editors -> Atto HTML editor

Then, the administrator should add "yukaltura" keyword to "Toolbar config".

Finally, please click "Save changes" button at the bottom of screen.

This plugin generate three buttons on the Atto toolbar. Note that, uploader and recorder buttons are visible, only if the administrator allows users to upload and record media.
